Fibre Composition - BS ISO 17751: 2007		
<p>Comments : A fibre composition test was carried out on the sample submitted using light microscope techniques and digital software to count the fibres, with reference to BS ISO 17751: 2007. In respect of correlation trials carried out, the actual percentage of each fibre stated should be accurate to 4% or better.</p>		
Results :	Fibre	Percentage
	CASHMERE	100%

A trace of wool was found to be present in the sample tested. As this was less than 5% of the overall composition it has been classified as an inadvertent impurity and therefore ignored.

This report is made solely on the basis of your instructions and/or information and materials supplied by you. It is not intended to be a recommendation for any particular course of action. Intertek does not accept a duty of care or any other responsibility to any person other than the Client in respect of this report and only accepts liability to the Client insofar as is expressly contained in the terms and conditions governing Intertek's provision of services to you. Intertek makes no warranties or representations either express or implied with respect to this report save as provided for in those terms and conditions. We have aimed to conduct the Review on a diligent and careful basis and we do not accept any liability to you for any loss arising out of or in connection with this report, in contract, tort, by statute or otherwise, except in the event of our gross negligence or willful misconduct.
